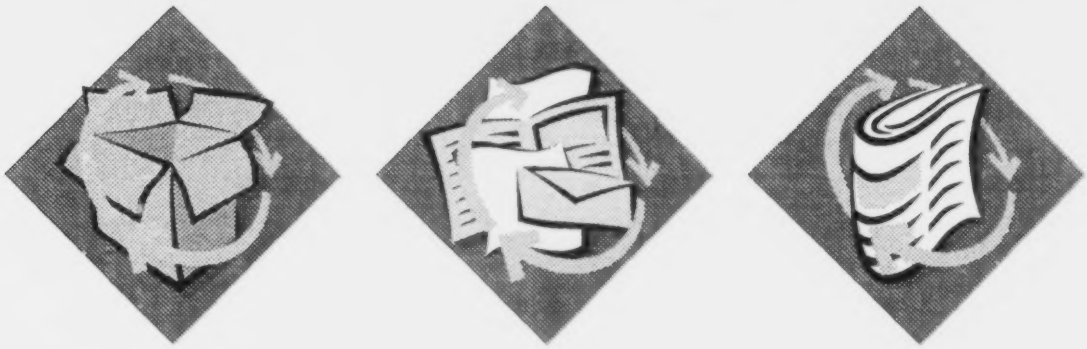
We have made it the Corporation's goal each year to provide our membership with the best and most responsive solid waste services possible, and we take pride in our work.

We are excited about RSWC's future. The Corporation is prepared to meet the challenges that lie ahead.

We plan to remain strong and be prepared to meet the challenges of the next several years. We are dedicated and committed to serve the ever-changing needs of our small, but "wonderful" region.

Where are we now? Where do we go from here? Two questions that are vital to successfully managing Restigouche's solid waste?



Ce fut le but de la Corporation depuis le tout début de fournir à nos citoyens le meilleur service de gestion des déchets solides et nous sommes fier de notre travail.

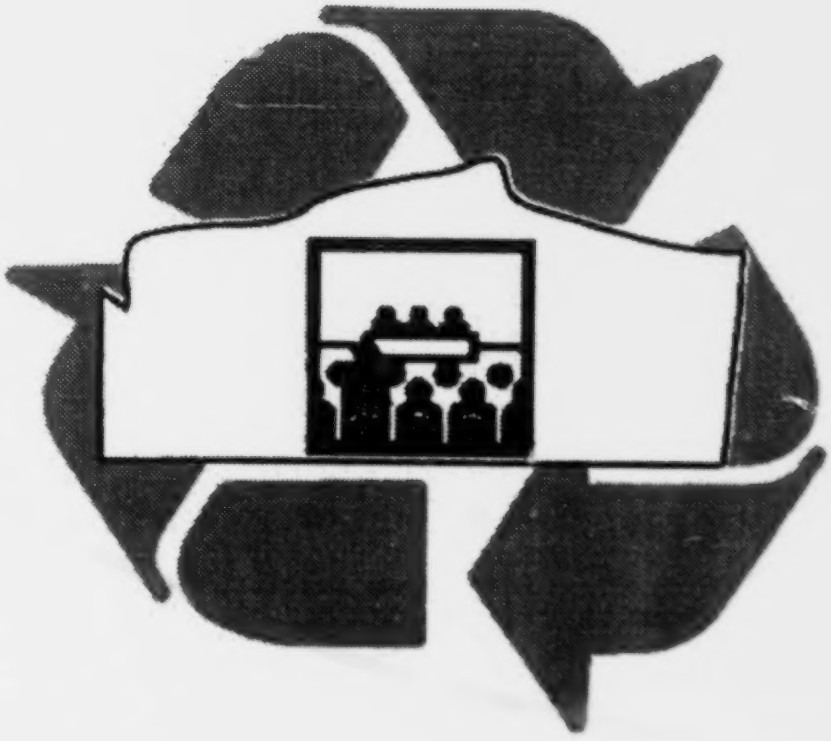
Nous sommes confiants de l'avenir de la CDSR. La Corporation est prête à faire face aux défis du futur.

Nous planifions de demeurer forts et sommes prêts à faire face aux défis des année à venir. Nous sommes dévoués et engagés de servir les besoins de notre petite, mais "merveilleuse" région.

Où sommes nous maintenant ? Où allons-nous? Deux questions qui sont essentiels à gérer avec succès les déchets solides du Restigouche.

1

Introduction



Section 1
Introduction

The Restigouche Solid Waste Corporation provides policy direction and guidance to ensure the efficient and effective management of the region's solid waste management requirements now and in the years to come.

La Corporation des Déchets Solides du Restigouche fournit des politiques, directions et conseils pour assurer une gestion efficace des déchêts solides pour la région maintenant et pour les années à venir.

Our Strength Really is our Communities

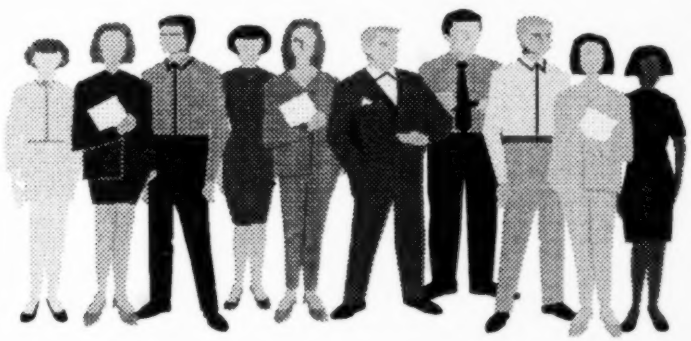
The title of this year's Annual Report is: **Our Communities, Our Strengths**.

It's appropriate because the many successes Restigouche Region achieved in 2004 were made possible through the strength of our member municipalities / lsd's. It is through their leadership and willingness to work together that we have formed efficient and productive service delivery partnerships. More than anything, 2004 was an outstanding year.

Notre Force est Vraiment nos Communautés

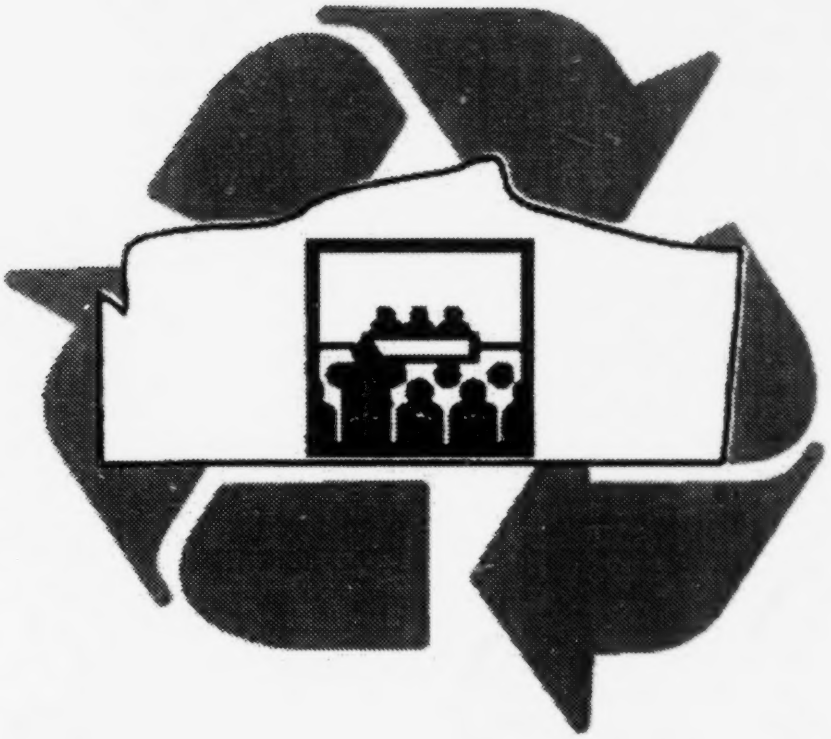
Le titre du Rapport annuel de cette année est : **Nos Communautés, Nos Forces**.

Il est approprié parce que les nombreux succès de la region du Restigouche réalisés en 2004 ont été rendus possibles par la force de nos municipalités / dsl's. C'est par leur leadership et empressement de travailler ensemble que nous avons formé une livraison de service efficace et productive. Quoi que ce soit, 2004 a été une année spectaculaire.



2

Chairman's Message
du Président



Section 2
Chairman's Message du Président

In our 2003 Annual Report, the previous Chairman, Boyd Poley, mentioned that 2004 would be a big year for Restigouche, a year of milestones and challenges, of tough choices and decisions. 2004 was all of those things, a year in which our region moved forward. Significant results have been achieved on a number of fronts.

Dans le rapport annuel de 2003, l'ancien président, Boyd Poley, avait mentionné que 2004 serait une année chargée pour le Restigouche, une année d'événements marquants et de défis, de choix et de décisions difficiles. L'année 2004 s'est avérée être tout cela, une année au cours de laquelle la région a connu des progrès. Des résultats importants ont été enregistrés sur plusieurs fronts.

The success we enjoyed in 2004, while supported by clear policy, was a direct result of the hard work and commitment of all our residents. It is by working together, government, business and workers, that we can achieve our full potential as a region.

Les succès que nous avons connus en 2004, bien que soutenus par des politiques publiques claires, sont directement attribuables au travail ardu, à l'esprit entrepreneurial et à l'engagement des gens du Restigouche. C'est en travaillant ensemble, le gouvernement, les entreprises et les travailleurs, que nous pouvons réaliser notre plein potentiel en tant que région.

Because of this, we are in a better position to build a better region for all, with key strategic investments for people, families and communities throughout Restigouche.

Pour cela, et grâce à une discipline financière rigoureuse, nous sommes mieux placés pour bâtir un Restigouche fort pour tous et toutes et effectuer des investissements stratégiques clés dans l'intérêt de la population, des familles et des collectivités partout au Restigouche.

However, this does not mean every decision will be an easy decision. Priorities must still be set and choices must still be made. That's why in 2005 we will continue our balanced approach of prudent fiscal management while focusing on the priorities of our residents – a green environment.

Toutefois, cela ne signifie pas que chaque décision à prendre est une décision facile. Il faut quand même établir des priorités et faire des choix. C'est pourquoi nous maintiendrons en 2005 une approche équilibrée, assurant une gestion financière prudente tout en nous concentrant sur les secteurs prioritaires pour les gens du Restigouche – une environment saine et verte.

By any measure, the Restigouche region enjoyed a banner year in 2004. And as I have said, much of the credit goes to an outstanding group of dedicated members for setting clear policies and keeping a close eye on the books.

Par n'importe quelle mesure, la région du Restigouche a joui d'une année exceptionnelle en 2004. Et comme je l'ai dit, beaucoup de crédit va à un groupe remarquable de membres dévoués qui ont établi des politiques et veiller à une excellente gestion financière.

A special thank you must also go to our Coordinator, Ian Comeau, for keeping the Corporation on the leading edge of responsible public policy and sound fiscal management. A special thank you as well to Maritime Disposal Incorporated for their outstanding partnership with RSWC.

Un merci tout spécial doit aussi aller à notre Coordonnateur, Ian Comeau, qui a su maintenir la Corporation responsables de ses politiques et à une excellente gestion fiscale. Un merci spécial aussi à Maritime Disposal Incorporated pour un partenariat remarquable avec la CDSR.

I am happy to announce that RSWC and MDI Waste Services have renewed the transfer contract for a 5-year period (2005-2009), and that we were able to reduce the cost at the transfer station by $3.13 / tonne (from $34.95 / tonne down to $31.82 / tonne). This is a saving of more than $50,000 for the residents and businesses in Restigouche.

Je suis heureux d'annoncer que la CDSR et MDI Waste Services ont renouvelé le contrat pour la gestion de la station de transfert, et ceci pour une période de 5 ans (2005-2009), et que nous avons réussi à réduire le taux de déversement à la station de transfert de 3.13 $ / tonne (de 34.95 $ / tonne à 31.82 $ / tonne). Ceci représente une épargen de 50,000 $ pour nos citoyens et entrepreneurs au Restigouche.

I am happy to announce as well that RSWC has hired its Solid Waste Coordinator, Ian Comeau, on a full time basis, and that we will concentrate our efforts on public consultation and education as these are very important tools if recycling is to be as successful as it is now in our region. The recycling of 165.49 tonnes in 2004 represented a saving of $21,000 for the Municipalities / LSD's within our region, and our goal is to double these amounts in 2005, etc. Not only did we save money, but we were able to preserve the environment – 165.49 tonnes represents a saving of 2,978 trees which did not need to be cut, and we preserved some space at the Red Pine landfill as we did not have to dispose of this material.

Je suis heureux d'annoncer aussi que la Corporation a embauché son Coordonnateru de la Gestion des Déchets Solides, Ian Comeau, sur une base à temps plein, et nous allons maintenat concentrer nos efforts sur la consultation publique et l'éducation car se sont deux importants outils aux succès du programme de recyclage dans notre région. Le recyclage de plus de 165.49 tonnes de cartons et papiers représente des épargnes de 21,000 $ pour nos municipalities / DSL's, et notre but est de doubler ces montants en 2005, etc. Non seulement avons nous économiser de l'argent, mais nous étions capables de

préserver l'environnement - 165.49 tonnes représentent une économie(un sauvetage) de 2,978 arbres qui n'ont pas dû être coupés et nous avons préservé un certain espace à l'enfouissement sanitaire de Red Pine car nous n'avons pas dû disposer de ce matériel.

It is a privilege and a delight to work with such a fine team and I look forward to even further successes in the future.

C'est un privilège et un plaisir de travailler avec une équipe si remarquable et j'attend avec impatience ce que l'avenir nous apportera.

I invite you to continue to work with us as we overcome our challenges, as we embrace the future with pride, confidence and hope – a better Restigouche for all.

Je vous invite à poursuivre votre collaboration avec nous alors que nous surmontons les défis auxquels nous faisons face, que nous envisageons l'avenir avec fierté, confiance et espoir, et que nous créons des possibilités accrues - un Restigouche meilleur pour tous et toutes.

This annual report constitutes the reflection of our commitment supported towards the environmental protection and towards our contribution to a better management of the solid waste in Restigouche

Ce rapport annuel constitue le reflet de notre engagement soutenu à l'égard de la protection de l'environnement et de notre contributionà une meilleure gestion des déchets solides au Restigouche

Sincerely Yours / Sincèrement,

Jean Perron

Jean Perron
Chairman / Président

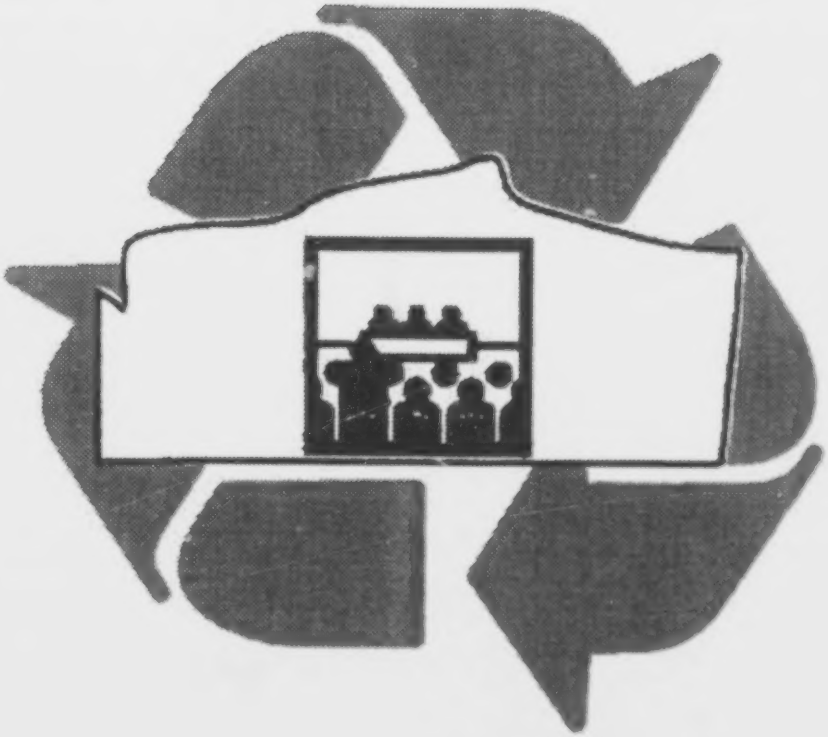
Coordinator's Message du Coordonnateur



Section 3
Coordinator's Message du Coordonnateur

A Success by any Measure

The successful delivery of programs and services and the attractiveness of any community can be measured several ways.

Perhaps the most obvious measurement is the commitment of our population. People want to live and work in our communities where water, air is clean?

Un succès par n'importe quelle Mesure

La livraison couronnée de succès de programmes et des services et l'attrait de nos communautés peut être mesurée de différentes façons.

La mesure la plus évidente est l'engagement de notre population. Nos citoyents veulent vivre et travailler dans des communautés où l'air est propre, l'eau est pure et nos communautés saines, et durables.

A Commitment to Fiscal Responsibility

We can also measure our success by how we managed the public purse. For a 10th consecutive year – RSWC recorded a surplus in its administrative account, and we continue to enhance our reserve funds (Capital and Operation).

Un Engagement à Responsabilité Fiscale

Nous pouvons aussi mesurer notre succès sur la façon dont nous gérons le trésor public. Pour une 10ème année consécutive – la CDSR a enregistré un surplus dans son compte administratif et nous continuons à augmenter nos fonds de réserve (Capital et Opération).

Success Through Partnerships

The Restigouche region experienced a truly remarkable year in 2004, with over 165 tonnes of paper and cardboard being diverted from the transfer station and from the Red Pine Landfill. As a regional corporation, we also experienced a reduction in residential tonnage – a goal for the years to come, and by achieving several other significant milestones that kept us at the forefront of public administration in New

Brunswick. Of the four northern regions – RSWC is the only region with a recycling program.

Our many achievements, however, would not have been possible without the vibrant communities managed by our 7 member municipal partners, 14 Local service districts and one first nation community. Our communities certainly are the Region's strength.

In October – November, RSWC negotiated with MDI Waste Services in regards to renewing the transfer station contract for 5 years, and we were successful with a $3.95 / tonne reduction. MDI has also committed for the next 5 years 4 $500 scholarships for the 4 regional high schools. It is through these partnerships that we can commit to some fiscal responsibilities.

Succès Par Partenariat

La région du Restigouche a éprouvé d'une année vraiment remarquable en 2004, avec plus de 165 tonnes de papier et de carton étant détournés de la station de transfert et de l'Enfouissement Sanitaire de Red Pine. En tant que Corporation régionale, nous avons aussi éprouvé une réduction du tonnage résidentiel - un but pour les années à venir et en réalisant plusieurs autres événements significatifs qui nous ont tenus au premier rang d'administration publique au Nouveau Brunswick. Des quatre régions du nord – la CDSR est la seule région avec un programme de recyclage.

Beaucoup de nos exploits, cependant, n'auraient pas été possibles sans les communautés vibrantes gérées par nos 7 municipalités, 14 districts des services locauxs et une première nation. Nos communautés sont certainement la force de la région.

En octobre - novembre, la CDSR négocia avec des MDI Waste Services concernant un contract pour la reprise de la station de transfert pour une période de 5 ans et nous avons réussi avec une réduction de 3.95 $ / tonne. MDI s'est aussi engagé pour les 5 prochaines années avec 4 bourses de 500 $ pour les 4 écoles sedondaires de la région. C'est par ces partenariats que nous pouvons nous engages à quelques responsabilités fiscales.

A Commitment to Fiscal Responsibility

Our sound fiscal policies have once again been rewarded with a 10th consecutive surplus.

Two of our most significant accomplishments involved programs related to recycling, and the Federal HST rebate program. We were one of the first corporations in NB – and one of the smallest ones – to apply for an HST exemption on services provided outside the transfer station, and we were rewarded with a 100% exemption in 2001 – this is now being followed through by other Commissions with transfer stations. Our expertise has been requested.

In these cases, the New Brunswick Solid Waste Association (NBSWA / ADSNB) praised our management of the models for others to follow.

We were also active in enhancing our reserve funds (capital and operation).

Un Engagement envers une Responsabilité Fiscale

Nos politiques fiscales saines ont de nouveau été récompensée avec un 10ème surplus consécutif.

Deux de nos exploits les plus significatifs ont impliqué des programmes liés au recyclage et au programme Fédéral de rabais de la TPS. Nous étions une des premières Corporations au NB - et une des plus petites - pour demander une exemption de la TPS sur des services fournis à l'extérieur de la station de transfert et nous avons été récompensés avec une exemption de 100 % en 2001 - c'est maintenant mené et étudié par d'autres Commissions avec des stations de transfert. Notre expertise est à la demande.

Dans ces cas, l'Association des Déchets Solides du Nouveau Brunswick a souligné notre gestion des modèles pour d'autres à suivre.

Nous étions aussi actifs par l'amélioration de nos fonds de réserve (capital et opération).

Putting People First

We continue to place a very high value on customer service as our programs and services increase in scope and complexity. From the creation of a full time position (Solid Waste Coordinator) to our annual report, and web site in 2005 - we will continue to emphasize the importance of customer service.

Only a short time ago, RSWC was a $60,000 Corporation. Now, due to the realignment of responsibilities, we have grown into a $218,000 Corporation, operating services, such as recycling.

Our mandate is to operate these services in a fiscally responsible manner, with a clear vision of the future direction of service delivery. We will continue fulfilling this important mandate and maintain Restigouche region's position as:

> "***Under the leadership of our members, we are committed to the protection and to the improvement of the quality of our environment for the future generations***".

Les Gens en Premier

Nous continuons à placer une très haute valeur sur les services plus que nos programmes augmentent et deviennent complexes. De la création d'une position de Coordonnateur de la gestion des déchets solides à plein temps, à notre rapport annuel et à notre nouveau site Web en 2005 - nous continuerons à souligner l'importance d'un bon service à notre population.

Il y a peu de temps seulement que la CDSR était une Corporation de 60,000 $. Maintenant, en raison du réalignement de responsabilités, nous nous sommes développés en Corporation de 218,000 $ qui offre des services d'exploitation comme le recyclage.

Notre mandat doit faire fonctionner ces services d'une façon fiscalement responsable, avec une vision claire dont de livraison de service dans le futur. Nous continuerons à accomplir cet imporant mandat et maintiendrons la position de la Corporation pour la région du Restigouche:

> ***"Sous le leadership de nos membres, nous sommes engagés à la protection et à l'amélioration de la qualité de notre environnement pour les générations futures".***

Sincerely Yours / Sincèrement,

Ian Comeau

Ian Comeau
Coordinator / Coordonnateur

Working For you! Working with You!
On travaille pour vous et avec vous!

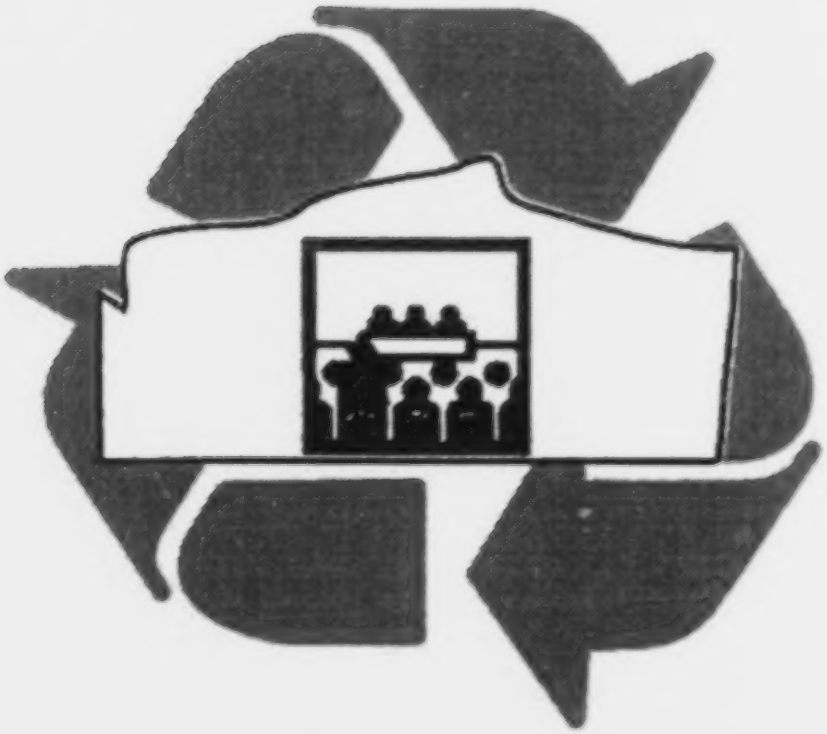
Profile / Profil



Section 4
Profile / Profil

Profile - Restigouche Solid Waste Corporation

Early in 1987, we realized that to manage our solid waste and to achieve diversion goals, we would have to approach waste management cooperatively. Studies commissioned in 1990 by the New Brunswick Department of the Environment showed that great savings could be made if Municipalities/LSD's planned and developed waste management on a regional basis.

The strategy supported this approach, and thus required that 12 Solid Waste Regions be established in the province. Each of the regions would submit Solid Waste Management plans to the Minister of the Environment describing the elements each region would use to manage its solid waste.

The Restigouche Solid Waste Corporation (RSWC) is an active group of 11 Municipal and LSD representatives representing the interest of 30,000 residents within the Restigouche region (Robinsonville to Nash Creek). The Corporation and its agents are accountable to a Board of Directors made up of local elected officials.

Currently, the Chairman is Jean Perron, representative for the Central LSD's. Serving as Vice-Chairman is Denis McIntyre, representative for the Village of Charlo, and serving as Secretary-Treasurer is Donald Pollock, representative for the Village of Tide Head. Their term expire in August 2005 when RSWC holds its election. In addition, the Corporation has eight other active Members representing the City of Campbellton (1), the Town of Dalhousie (1), the Villages of Atholville (1), Balmoral (1), Eel River Crossing (1), and the Unincorporated areas or Local Service Districts (3).

RSWC works to ensure that the region's waste is handled properly. Municipal solid waste (msw) includes garbage and refuse generated at homes, offices and industries, leaf and yard wastes, and construction and demolition wastes.

The Corporation was created in 1992 in accordance with the Clean Environment Act (Regulation 96-11), which set regions waste reduction goals and authorized regions to form Commissions / Corporations that would work to achieve these goals.

Operating funds are generated from the Transfer Station tipping fees ($2 / tonne royalty for 10 consecutive years; $5.13 / tonne in 2005), a recycling fee of $4.97 / tonne which was introduced in 2003, and grants. Most of the grant money would come from the Provincial Department of the Environment and Local Government (DELG).

RSWC addresses issues that affect solid waste management within the Restigouche region (Re: education, recycling, waste collection, illegal dumping, illegal reclamation sites, etc.).

Board meetings are held monthly (see the 2004 schedule of meetings) and current topics of concern are discussed. RSWC encourages participation in its activities, etc.

Profil – Corporation des Déchets Solides du Restigouche

La Corporation des Déchets Solides du Restigouche (CDSR) est un groupe actif de 11 Représentants des Municipalités et DSL's ayant comme mandat de représenter l'intérêt de 30,000 résidents de la région du Restigouche (Robinsonville à Nash Creek) dans le dossier est la gestion des déchets solides.

Actuellement, le Président de la Corporation est Jean Perron, un des 4 représentants pour les Districts des Services Locaux (DSL's). Le Vice-Président est Denis McIntyre, représentant pour le Village de Charlo, et le Secrétaire-Trésorier est Donald Pollock, représentant du Village de Tide Head. Le mandat de cet Exécutif se termine en août 2005. Il y a aussi 8 autres Membres qui siègent au sein de la Corporation. Ces Membres représentent: la Cité de Campbellton (1), la Ville de Dalhousie (1), les Villages d'Atholville (1), Balmoral (1), Eel River Crossing (1), et les Districts des Services Locaux (3).

La Corporation se rencontrent mensuellement (voir la cédule 2004 des réunions) pour discuter de sujets ayant intérêt avec la gestion des Déchets Solides pour la région du Restigouche. Les déchets solides urbains comprennent généralement les déchets résidentiels, industriels légers, commerciaux et institutionels dont la cueillette est assuré par les Municipalités/DSL's et/ou par des Entrepreneurs.

La Corporation reconnaît l'importance de protéger et améliorer l'environnement, et s'engage à fournir un leadership aux communautés qu'elle déssert dans le domaine de la gestion des déchets. La Corporation apprécie les besoins et responsabilités des gouvernements locaux et s'engage à consulter les citoyens et les secteurs industriels, institutionels et commerciaux de la région afin de gérer les déchets qu'ils produisent de façon responsable envers l'environnement, acceptable pour la société et économiquement réalisable.

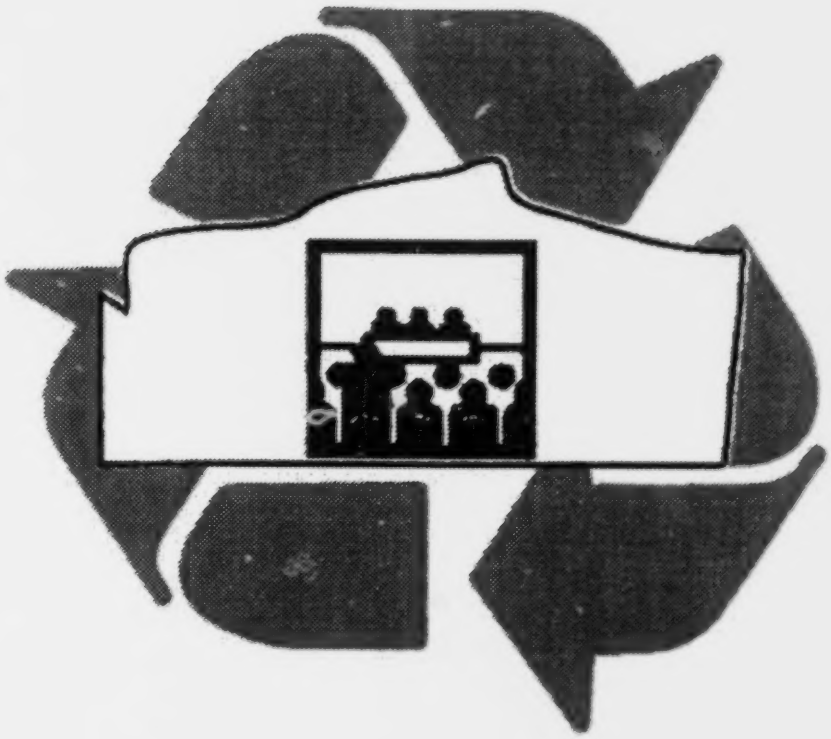
La Corporation opère un budget dont la majorité des fonds parviennent du montants / tonne (2 $ / tonne pour 10 ans consécutifs; et de 5.13$ / tonne en 2005). Des subventions gouvernmentales, principalement du Ministère de l'Environnement et des Gouvernments Locaux, sont aussi disponible aux Commissions des Déchets Solides du Nouveau Brunswick. La Corporation encourage la participation des gens à ses activités, etc.

Nos forces et notre dynamisme font que la Corporation est prête à jouer un rôle prépondérant dans les actions à mener en vue de l'atteinte des objectifs gouvernementaux. L'année 2004 nous aura donc permis de consolider notre action aux quatre coins du Restigouche et de développer une concertation essentielle avec l'ensemble des acteurs dans le domaine des déchets solides. Nous avons donc préparé l'avenir. Nous connaissons les besoins des résidents du Restigouche, nous avons analysé, étudié puis proposé des modes de gestion et un plan d'action.

Se Préoccuper de l'Environnment sans poser de gestes concrets n'est pas suffisant! Nous devons faire des choix qui puissent avoir un réel impact sur nos resources naturelles! L'Environnement - Nous devons faire quelque chose pour nous assurer que nos actions ne menaçent pas notre avenir!

5

Members / Membres



Section 5
Members / Membres

The tables below show the appointments of each Member, as well as their term. The first appointment (August 1st, 1995) was done by the Minister of the Environment, while all the others were and will be done by each Municipality (7), and by the Minister of the Environment and Local Government, upon consultation with the Municipal Service Representative who has met elected representatives from the LSD's.

Le tableau ci-dessous explique les nominations des Membres, ainsi que les termes dont ils ont été appointé pour. La première nomination (août 1995) a été effectué par la Ministre de l'Environnement.

Rapport sur le Tonnage Report

Tonnage Generation - Municipalities / LSD's, ICI
A Breakdown / A Comparison

Waste Sream	Tonnage
Residential	9,906.51
Commercial	5,214.80
C & D	515.95
Recycling	165.49
TOTAL	15,802.75

According to the 2004 Waste Audit, roughly 63.4% (9,907 tonnes) of our solid waste is generated by the households, and 36.6% (5,731 tonnes) comes from businesses, institutions, and industries. These numbers could, and would be much higher if it wasn't for the C & D sites, and reclamation sites within our region. Where are the tonnage numbers for these sites? It would be nice to see the tonnage generated at these sites, and would it be considered a diversion from sanitary landfills / transfer stations?

Selon les chiffres pour l'an 2004, 63.4% (9,907 tonnes) de nos déchets sont produits par le secteur résidentiel, et 36.6% (5,731 tonnes) proviennent du secteur commercial (ICI). Ces chiffres seraient plus élevés si nous aurions aucun site de réclamation (débris de construction) dans la région du Restigouche. Ces sites ont-ils enrégistrés le tonnage pour l'an 2004, et peut-on inclure ceci à nos chiffres comme étant une réduction, ou comme étant un réacheminement de déchets?

TABLE / TABLEAU - 2004

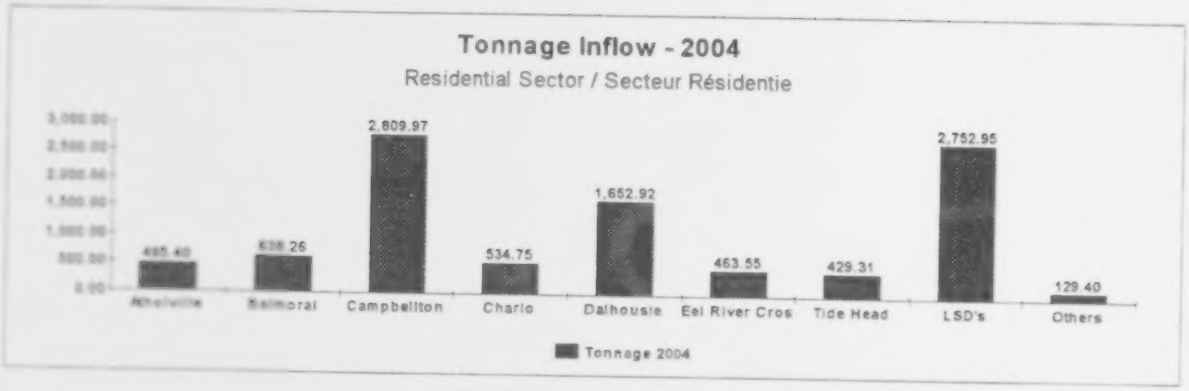

TABLE / TABLEAU - 2003

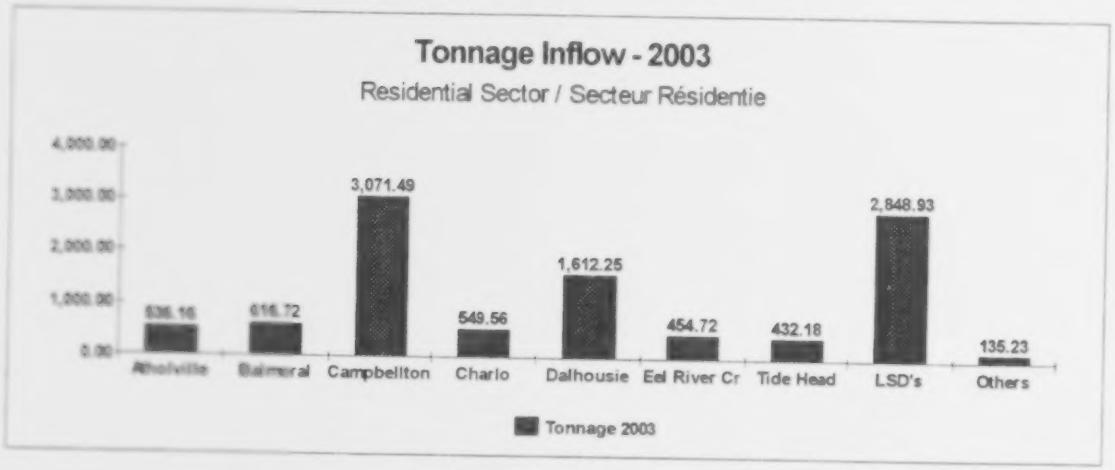
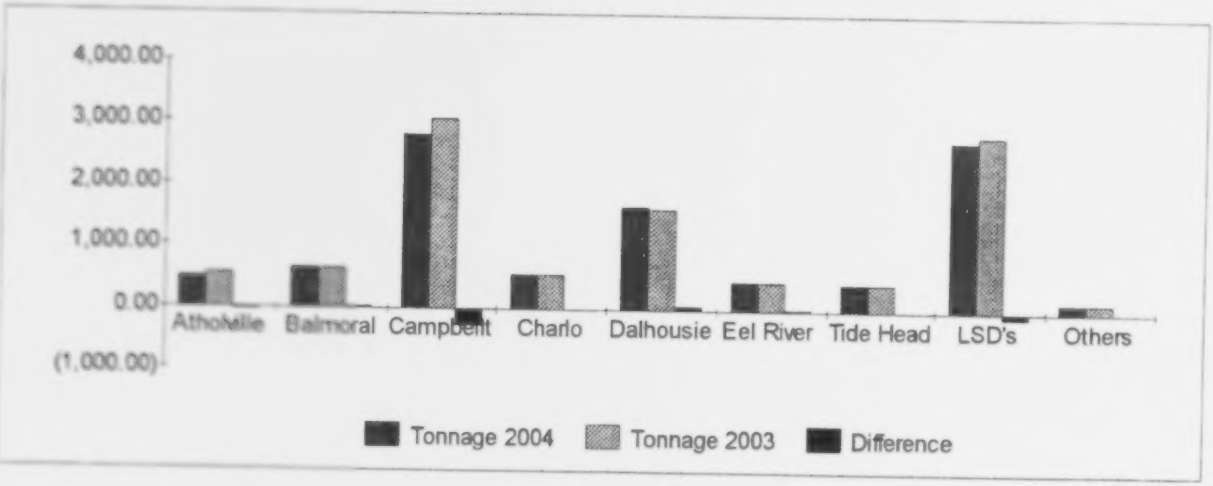


COMPARAISON
2003 vs 2004



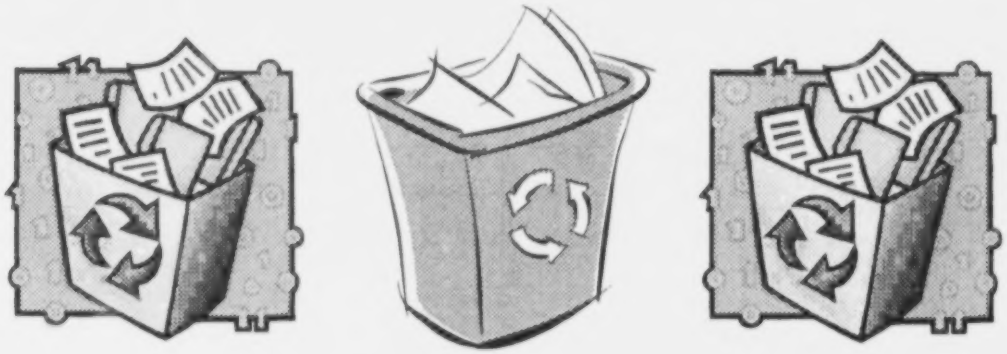
The 2004 figures determined that 34.1% of the Restigouche's Municipal Solid Waste was produced in the Atholville / Campbellton / Tide Head area. That percentage changes somewhat with the 5,731 ICI tonnes (36.6%), but the Campbellton area is still the region's major waste

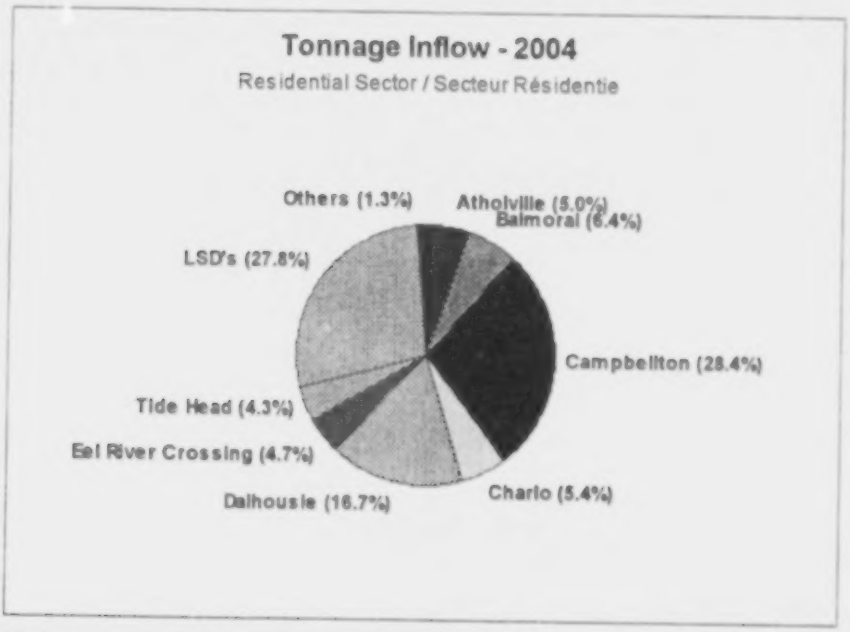
generator. There was a decrease of 350.73 tonnes at the Residential level, and an increase of 35.10 tonnes at the ICI level. We saw an overall decrease of 315.63 tonnes if you compare these stats with the 2003 numbers. If you add the 165.49 tonnes of recyclables to the residential decrease of 350.73 tonnes - it would bring the decrease totals to 516.22 tonnes (5.12%). At the residential level, Campbellton had the biggest decrease (261.52 tonnes – a decrease of 8.5%) while Dalhousie registered the biggest increase (40.67 tonnes – an icrease of 2.5%).

Selon les chiffres pour l'an 2004, 34.1% des déchets proviennent de la région d'Atholville / Campbellton / Tide Head. Le pourcentage change si nous incluons une part des 5,731 tonnes (36.6%) du secteur commercial (ICI). Lorsque l'on compare les statistiques de l'an 2004 avec 2003; on remarque une dimunition de 350.73 tonnes au secteur residential et une augmentation 35.10 tonnes au secteur commercial (ICI). Nous avons donc vu une diminution de 315.63 tonnes si l'on compare le tonnage de 2004 à celui de 2003. Si l'on ajoute les 165.49 tonnes de recyclables à la diminution résidentielle de 350.73 tonnes - le total de diminution est 516.22 tonnes (5.12 %). Au niveau résidentieal, Campbellton avait la plus grande diminution (261.52 tonnes - une diminution de 8.5 %) tandis que Dalhousie a enregistré la plus grande augmentation (40.67 tonnes – une augmentation de 2.5 %).

On average, each resident generated 0.34 tonnes (753.42 lbs) in 2004, a decrease of 45 lbs / resident compare to 2003; and each household generated an average of 0.91 tonnes (2,006.29 lbs) in 2004, a decrease of 120 lbs / household compare to 2003. On a per month basis, we generated 0.01 tonnes (62.79 lbs)/resident, compared to 0.08 tonnes (167.2 lbs)/household. On a per week basis, we generated 0.01 tonnes (14.5 lbs)/resident, compared to 0.02 tonnes (38.6 lbs)/household. Please take note that these numbers only reflect the municipal solid waste of 9,906.51 tonnes. Roughly 37% of our waste is paper products, such as newsprint, fine paper, and corrugated cardboard.

En moyenne, chaque résidant ont produit 0.34 tonnes (753.42 livres) en 2004, une diminution de 45 livres / résidant si l'on compare les statistiques de 2003; et chaque ménage (maison) ont produit une moyenne de 0.91 tonnes (2,006.29 livres) en 2004, une diminution de 120 livres / ménage si l'on compare les statistiques de 2003. Sur une base mensuelle, nous avons produit 0.01 tonnes (62.79 livres) / résidant, comparé à 0.08 tonnes (167.2 livres) / ménage. Sur une base hebdomadaire (par semaine), nous avons produit 0.01 tonnes (14.5 livres) / résidant, comparé à 0.02 tonnes (38.6 livres) / ménage. Il est important de noter que ces numéros reflètent seulement les déchets municipales / résidentiels de 9,906.51 tonnes. En moyenne, 37 % de nos déchets sont des produits de papier, comme le papier journal, le papier de bureau et le carton ondulé.





Waste Sream	Tonnage	Avg/Week	Avg/Resident
Atholville	495.40	9.53	0.36
Balmoral	638.26	12.27	0.32
Campbellton	2,809.97	54.04	0.33
Charlo	534.75	10.28	0.33
Dalhousie	1,652.92	31.79	0.37
Eel River Crossing	463.55	8.91	0.32
Tide Head	429.31	8.26	0.37
LSD's	2,752.95	52.94	0.28
Others	129.40	2.49	
TOTAL	**9,906.51**	**190.51**	**0.33**

The region saw a decrease of 315.63 tonnes in 2004, and an additional decrease 165.49 tonnes of fibres (newspaper, paper, cardboard) and this decrease (350 tonnes or 6.73 tonnes/week) is basically the work of the Residential sector. The ICI sector saw 35.10 more tonnes (0.68 tonnes/week). If you compare these numbers to the 2003 drastic increase of 449.64 tonnes (8.64 tonnes/week) at the residential sector – we are the right track. In 2003, the biggest increase at the residential sector was Campbellton with 265.85 tonnes (5.11 tonnes/week), and in 2004, the biggest decrease at the residential sector was Campbellton with 261.52 tonnes (5.03 tonnes/week).

La région a vu une diminution de 315.63 tonnes en 2004, et une diminution additionnelle de plus de 165.49 tonnes de fibres (papier journal, le papier de bureau, le carton) et cette diminution est essentiellement le travail du secteur Résidentiel. Le secteur ICI a vu une augmentation de 35.10 tonnes (0.68 tonnes/semaine). Si l'on compare l'augmentation de 2003 de 449.64 tonnes (8.64 tonnes / semaine) au secteur résidentiel – on est sur le bon chemin . En 2003, la plus grande augmentation au secteur résidentiel fut celle de Campbellton avec 265.85 tonnes (5.11 tonnes / semaine), alors qu'en 2004 Campbellton enrégistre la plus haute diminution avec 261.52 tonnes (5.03 tonnes/semaine).

Section 8
Financial Statement
État Financier

The Corporation's 2004 **$153,426.60** budget was adopted on November 27th, 2003 with increases to both its revenues and expenses. The total balanced budget was $153,426.60 – a 10.1% increase if you compare these numbers to the 2003 budget.

The increases for revenues were: $12,500 for translation, $1,606.52 for equalization, $1,151 for the GST rebate, and $1,000 in royalties. There was a decrease in revenues: the budgeted surplus in 2004 was $2,648 (2002) compare to the budgeted surplus of $4,799 (2001) in 2003.

The increases in expenses were: $12,500 for translation, and $1,606.52 for equalization.

Le budget 2004 de la Corporation pour 153,426.60 $ fut adopté le 27 novembre 2003 avec des augmentations pour les revenues et dépenses. Le budget proposé pour 2004 représente une augmentation de 10.1% si l'on compare ce budget à celui de 2003.

Les augmentations pour les revenues sont: 12,500 $ pour la traduction, 1,606.52 $ pour "equalization", 1,151 $ en rabais de TPS, et 1,000 $ en royautés. Il eut une dimunition en revenues: le surplus budgeté en 2004 était de 2,648 $ (2002) comparé au surplus budgeté de 4,799 $ (2001) en 2003.

Les augmentations pour les dépenses sont: 12,500 $ pour la traduction, et 1,606.52 $ pour "l'equalization",

AUDITORS' REPORT

To The Directors of
Restigouche Solid Waste Corporation

We have audited the operating fund and reserve funds balance sheets of Restigouche Solid Waste Corporation as at December 31, 2004 and the operating fund statement of revenue and expenditures for the year then ended. These financial statements are the responsibility of the Corporation's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether these financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Corporation as at December 31, 2004 and the results of its operations for the year then ended in accordance with Canadian generally accepted accounting principles.

RESTIGOUCHE SOLID WASTE CORPORATION

Notes To The Financial Statements

For The Year Ended December 31, 2004

1. Nature of Activities

The Restigouche Solid Waste Corporation was incorporated under the Province of New Brunswick Clean Environment Act (O.C. 96-173) by Order-in-Council 95-749, dated July 20, 1995 as a not-for-profit organization. It has been established to administrate a transfer station for Restigouche County. All refuse collected is hauled to Red Pine landfill site in Allardville, NB.

2. Significant Accounting Policies

These financial statements have been prepared to conform in all material respects to the accounting principles prescribed for New Brunswick municipal entities by the Department of Environment and Local Government.

a. Revenue Recognition

Major sources of revenue are recorded on an accrual basis.

b. Expenditure Recognition

Expenditures are recorded on an accrual basis. Outstanding commitments for goods and services relating to the current year are accrued at the balance sheet date.

c. Capital Assets

Capital assets are recorded at cost. They do not record depreciation on their equipment. Funds received through capital assistance programs, cost sharing arrangements are treated as additions to investment in capital assets.

3. Facility Ownership

The transfer station facility is owned by Maritime Disposal Inc. and will be conveyed to Restigouche Solid Waste Corporation for $1 December 31, 2009 due to the renewal of the contract for an additional 5 year term.

4. Contributed Surplus

The Department of Environment and Local Government's Environmental Trust Fund transferred the recycling containers to Restigouche Solid Waste Corporation.

RESTIGOUCHE SOLID WASTE CORPORATION

Notes To The Financial Statements

For The Year Ended December 31, 2004

5. Surplus

The Municipalities Act requires surplus amounts of municipal entities to be absorbed into the operating budget the second following year. Accordingly, the 2003 surplus of $11,035 must be budgeted in the 2005 fiscal year and the 2004 surplus of $7,282 must be budgeted in the 2006 fiscal year by the Corporation.

6. Statement of Cash Flow

A statement of cash flow was not presented as the directors of the Corporation believe that it would not add any additional information for readers of the financial statements.

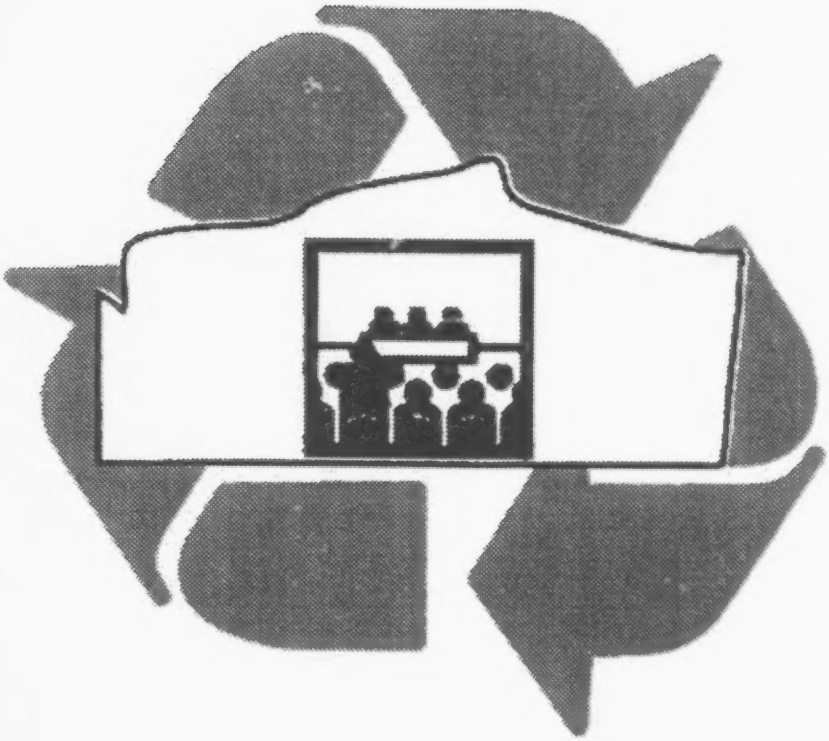
7. Financial Instruments

Fair Values

The carrying amount of current assets and current liabilities approximates their fair value due to the short term maturities of these items.

10

Rapport de MDI's Report

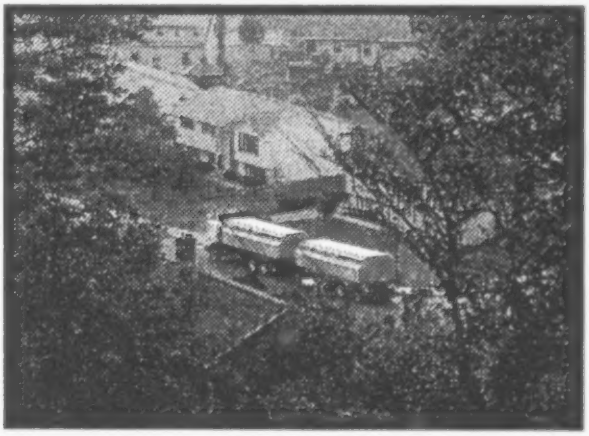


Section 10
MDI Waste Services in the Restigouche Region

MDI Waste Services, a New Brunswick owned and operated company, is proud of the role it is playing in providing waste and recycling services to the Restigouche Solid Waste Corporation and to the residents and businesses of Restigouche County. MDI is the largest solid waste and recycling company in Atlantic Canada and serves municipal, commercial and residential customers throughout Atlantic Canada.

Recycling

This year marked the second anniversary of the residential depot-recycling program in Restigouche County. This program, the first residential recycling service to be offered in the region, is a partnership between the Restigouche Solid Waste Corporation and MDI Recycling Services. MDI developed the roll off depot-based system, designed specifically to effectively and efficiently service the recycling demands of the residential sector. The Corporation has purchased the bright blue depot containers, adding two additional sites this year, and MDI is contracted to provide collection and recycling services for the materials deposited in the depots.



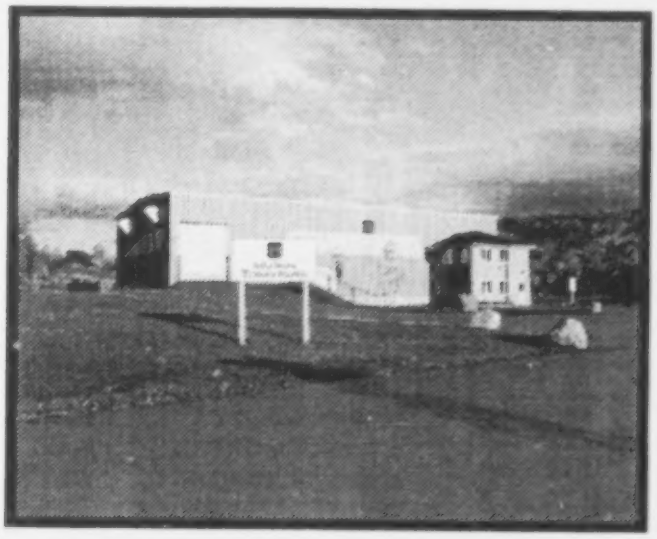
The first two years of operation of the program has resulted in a very significant amount of diversion of recyclable materials away from the traditional waste steam going to the landfill at Redpine. Over two hundred and fifty tonnes of paper, cardboard and corrugated material have been removed from the residential waste stream and sent for recycling back into usable products.

The volume of paper, cardboard and corrugated material recycled through this program contained the amount of fiber equivalent to a forest of nearly 5000 trees. The ongoing cooperation between the Restigouche Solid Waste Corporation and MDI Recycling Services combined with the continued support of area residents has resulted

in a significant contribution to the waste diversion goals of both Restigouche County and our province.

MDI also provides cardboard and office paper collection and recycling services directly to commercial and institutional customers adding further to the volume of waste materials being diverted from landfill disposal in the region.

Solid Waste Transfer Station



MDI Waste Services operates the regional waste transfer station for the Restigouche Solid Waste Corporation. All waste materials collected in the region are taken to the station for transfer into large capacity waste hauling trailers. This results in a significant saving in cost for local haulers in avoiding the lengthy trip to the Redpine landfill facility. The Corporation and MDI recently renewed the transfer station operating agreement which will see MDI continue to operate this facility for another term.

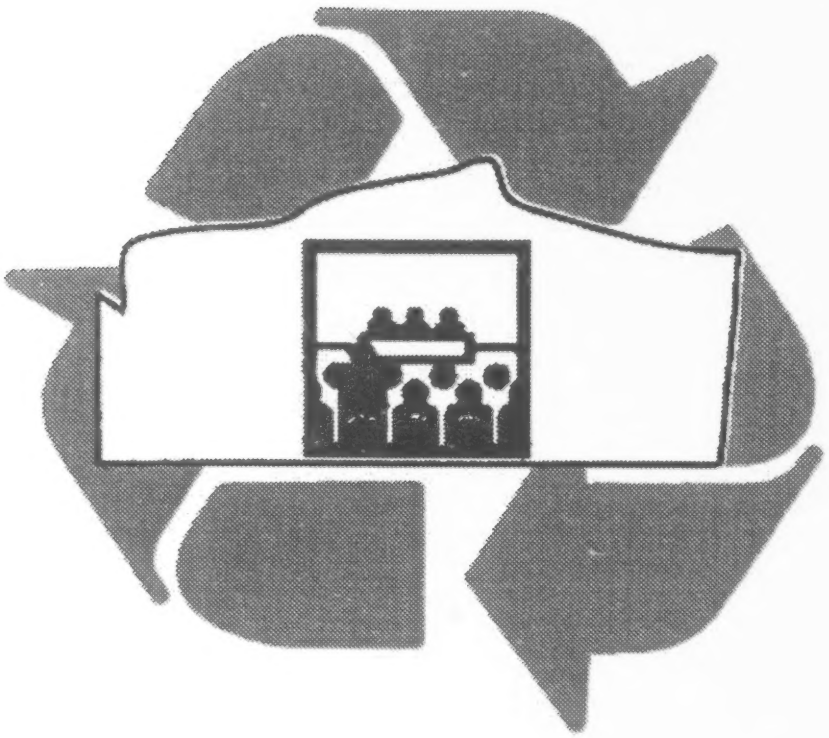
MDI's Commitment

MDI Waste Services is committed to continue to provide innovative and cost efficient solutions to waste management and recycling services in Restigouche County. Supported by a wide network of equipment and human resources, MDI has the expertise and experience to meet the varied needs of waste management and recycling in this region.

MDI Waste Services

11

Conclusion



Section 11
Conclusion

Increasingly, our environmental efforts as a Corporation are directed at the general public. Yes, we still have important and ongoing work to do to address very specific groups, issues across this entire region. But that work is very concentrated. It involves consultation and negotiation with a clear focus for all parties concerned.

However, reaching out to every resident within Restigouche is much different. It presents real challenges for public education and social marketing that our Corporation alone cannot successfully take on.

Most of all, RSWC wants to engage each of you – not to mention the many other stakeholders who have the capacity to help mobilize our residents for action on waste reduction changes in the coming years.

I think as we look ahead, we need to start by recognizing just how far we've come on waste management. When we look back over the last several years, it is obvious that we have made very significant progress on measures to reduce our waste. We have made real progress to improve the way we throw out our garbage, but much more has to be done.

A great place to live starts with a neighborhood with clean water, unspoiled land, and air we can safely breathe. We have much to do and many old habits to break.

If Restigouche works together today, in a responsible way, we can build an even brighter future tomorrow.

Our members know we can only achieve great things when we work, dream, and build together, for a change.

And it is with confidence that our citizens in Restigouche will respond to the challenge before us.

Restigouche has always responded warmly to the idea of people and institutions working together, whether in the public sector, the private sector or the non-profit sector.

They don't want to see one-size-fits-all approaches. They do want to see new ideas, new technologies and the innovation those encourage.

Our Corporation understands this, and has drawn extensively on partnership – in all phases of our work on waste management (disposal, transportation, waste reduction,

recycling, education): the science development; the setting of goals and objectives; and the search for and implementation of solutions.

Over the next year, RSWC and its members will be focusing its attention on a number of issues that are revolving rapidly. Not to mention the costs that are associated with staying abreast of the ever-changing waste management world.

The ideas RSWC has described here today are part of an outline of a future Restigouche. To achieve that future, the Restigouche Solid Waste Corporation requires the participation, the engagement, and the active debate of all its citizens in Restigouche.

De plus en plus, nos efforts environnementaux comme Corporation sont adressés au grand public. Oui, nous avons toujours un travail important et en cours afin d'adresser des groupes très spécifiques et des questions à travers cette région entière. Mais ce travail est très concentré. Il implique la consultation et la négociation avec une idée éclaircie pour toutes les parties concernées.

Cependant, tendre la main à chaque résidant au Restigouche est beaucoup différent. Il présente des défis réels pour l'éducation publique et le marketing social que notre Corporation ne peut entreprendre seul avec succès.

Si le Restigouche travaille ensemble aujourd'hui, d'une façon responsable, nous pouvons construire un avenir encore plus brillant pour le futur.

Nos membres savent que nous pouvons seulement réaliser de grandes choses quand nous travaillons, rêvons et construisons ensemble pour un changement positif.

Et c'est avec confiance que nos citoyens du Restigouche répondront aux défis.

Restigouche répond toujours chaudement à l'idée des gens et des institutions de travailler ensemble, quand ça vient au secteur public, au secteur privé ou au secteur à but non lucratif.

Ils ne veulent surtout pas voir des approches "adaptent tout". Ils veulent vraiment voir de nouvelles idées, de nouvelles technologies et des innovations qu'ils encouragent.

Au cours des années à venir, la CDSR et ses membres concentreront leurs attentions sur un nombre de dossiers qui se développent rapidement. Il est important aussi de mentionner les dépenses quotidiennes qui sont associées au monde de la gestion des déchets toujours en évolution.

Les idées dont la CDSR ont décrit ici aujourd'hui font partie d'un plan d'avenir pour le Restigouche. Afin de réaliser cet avenir, la Corporation des Déchets Solides du Restigouche exigera la participation, l'engagement et le débat actif de tous ses citoyens dans le Restigouche.

Lectures and Awareness Sessions

The Restigouche Solid Waste Corporation made a sincere effort to promote itself as a group working with the community. This course of action is to continue with our agenda of "getting back to the people".

In 2004, several requests for lectures and presentations were received by the Corporation. Many of these lectures and presentations were delivered at the school level throughout the region.

Lectures covered such subjects as solid waste management, waste reduction, what can I do for the environment, the economics of recycling, and how to become environmentally friendly (reduction in energy, water, waste, etc.).

It's crucial that our future leaders, school kids, understand waste issues and how waste can be managed. There will always be garbage that must be dealt with safely, even after recycling, composting, and source reduction have done their part! Taking care of our "environment" is a big job!

There were three tours of the transfer station; 2 in the fall and 1 in the spring.

Editorial
Our Environment
Solid Waste Management in Restigouche

By: Ian Comeau, Solid Waste Coordinator
Restigouche Solid Waste Corporation

While we take this time every year to prepare an annual report and acknowledge the importance of a healthy environment for Restigouche, this year we also take pride in celebrating the 15th anniversary of the Corporation.

It is both a time to reflect on our successes and take stock of the challenges that still face our region. The past 15 years have been an explosion of innovation and new ideas.

Increasingly, our environmental efforts as a Corporation are directed at the general public. Yes, we still have important and ongoing work to do to address very specific groups, issues across this entire region. But that work is very concentrated. It involves consultation and negotiation with a clear focus for all parties concerned.

However, reaching out to every resident within Restigouche is much different. It presents real challenges for public education and social marketing that our Corporation alone cannot successfully take on.

Most of all, RSWC wants to engage each of you – not to mention the many other stakeholders who have the capacity to help mobilize our residents for action on waste reduction changes in the coming years.

I think as we look ahead, we need to start by recognizing just how far we've come on waste management. When we look back over the last several years, it is obvious that we have made very significant progress on measures to reduce our waste. We have made real progress to improve the way we throw out our garbage, but much more has to be done.

A great place to live starts with a neighborhood with clean water, unspoiled land, and air we can safely breathe. We have much to do and many old habits to break.

If Restigouche works together today, in a responsible way, we can build an even brighter future tomorrow.

Our members know we can only achieve great things when we work, dream, and build together, for a change.

And it is with confidence that our citizens in Restigouche will respond to the challenge before us.

Restigouche has always responded warmly to the idea of people and institutions working together, whether in the public sector, the private sector or the non-profit sector.

They don't want to see one-size-fits-all approaches. They do want to see new ideas, new technologies and the innovation those encourage.

Our Corporation understands this, and has drawn extensively on partnership – in all phases of our work on waste management (disposal, transportation, waste reduction, recycling, education): the science development; the setting of goals and objectives; and the search for and implementation of solutions.

Over the next year, RSWC and its members will be focusing its attention on a number of issues that are revolving rapidly. Not to mention the costs that are associated with staying abreast of the ever-changing waste management world.

The ideas RSWC has described here are part of an outline of a future Restigouche. To achieve that future, the Restigouche Solid Waste Corporation requires the participation, the engagement, and the active debate of all its citizens in Restigouche.

There is a simple equation that we must understand. A healthy environment will add to the health of our families and communities. An unhealthy environment will hurt us all.

Isn't it time we all started making healthy choices for our environment and for ourselves?

After all, what we are really talking about is making a choice for healthy neighborhoods; a choice for clean water to drink; a choice for beaches where our children can swim; and a choice for clean air.

This is a choice we have to work for. It's a choice in lifestyle, a choice in how we recycle and reuse. It involves how we get to work, as well as how we work -- of how we use our resources to promote our economy without sacrificing a renewable source of jobs and wealth for our citizens.

We often talk at our Corporation meetings about all the things that RSWC should do for the environment, but we tend to forget that it is the individual who often makes a critical difference -- people who take responsibility for their neighborhood, their region, their province and their country.

Of course, this Corporation will be dealing with a number of important environmental concerns in the coming months. Not the least of which will be the expansion of the recycling program in Restigouche. We will also continue our partnership with MDI Waste Services as they operate our transfer station and manage our recyclables.

In many ways, our environment goes straight to the heart of what makes us a region. Our respect and love for the land and sea is part of our heritage. It's a source of pride, and it continues to attract people from all over the world. We must plan for the future in order to protect this irreplaceable resource.

As it was once said by David Suzuki

The environment must become one of our major priorities as we prepare for the 21st century.

I strongly believe that the environment has become a priority for some, and that others will not before long jump on the bandwagon as soon as they see its benefits, etc.

Thank you for making a difference – a difference that will have some lasting effects!

Are we watching our Waste?

Surveillons-nous nos déchets?
